The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/534,985	Applicant(s) ZEIHER ET AL.	
	Examiner LISA V. COOK	Art Unit 1641	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction Vacated

1. Applicant's response to the Restriction Requirement mailed 2/20/09 is acknowledged (paper filed 3/13/09). The Restriction Requirement mailed 2/20/09 is vacated because the cited reference to Novo et al. was published after the filing date of the instant application. A new Restriction Requirement is presented herein. Examiner apologizes for any inconvenience this may cause Applicant. Currently claims 1-23 are pending and under consideration.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

To have a general inventive concept under PCT rule 13.1, the inventions need to be linked by a special technical feature. The special technical feature that appears to link claims 1-23 is the utility of biomarkers like sCD40L and CRP in acute cardiovascular diseases. However, the reference of Garlich et al. (Heart, Vol.86, 2001, pages 649-655) disclosed this special technical feature. Garlich et al. disclose that CD40L/CD154 is elevated in inflammatory acute coronary syndrome. For example see abstract. Various other markers, such as CRP and troponin were also measured. See Table 1 on page 650. . Therefore the technical feature recited in claims 1-23 is not a contribution over the prior art. Accordingly the groups set forth below are not so linked as to form a single general concept under PCT Rule 13.1.

Art Unit: 1641

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- A. Group I, claim(s) 1-17 and 22 are drawn to a method of analyzing a biological sample in connection with acute cardiovascular disease; classified in class 435, subclass 7.21, for example. (A 1st first method employing a special technical feature).
- B. Group II, claim(s) 18-19 are drawn to kits comprising reagents for analyzing cardiovascular diseases; classified in class 422, subclass 61, for example. (A 1st product comprising a special technical feature).
- C. Group III, claim(s) 20-21 and 23 are drawn to therapeutic methods monitoring acute cardiovascular diseases; classified in class 424, subclass 9.1, for example. (A 2nd method employing the special technical feature).

3. The inventions listed as Groups A through C do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Under PCT rules Applicant is entitled to an examination of one of the combination groupings: (1) a product, a method of using said product and a method of producing said product. The instant claims are directed to multiple methods and product utilizing a special technical feature that is not a contribution over the prior art. Accordingly, Applicant must select one for further prosecution.

Art Unit: 1641

4. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group A through C are not totally inclusive, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 1641

7. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO fax center located in Crystal Mall 1. The faxing of such papers must conform to the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The Group 1641 Fax number is (571) 273-8300, which is able to receive transmissions 24 hours/day, 7 days/week.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lisa V. Cook whose telephone number is (571) 272-0816. The examiner can normally be reached on Monday - Friday from 7:00 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Shibuya, can be reached on (571) 272-0806.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group TC 1600 whose telephone number is (571) 272-1600.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.
